Table of Contents

The Biology of Forest Growth experiment: an introduction
M.L. Benson, J.J. Landsberg and C.J. Borough (Canberra, ACT, Australia) 1
Site water balance and tree water status in irrigated and fertilised stands of *Pinus radiata*
B.J. Myers and T. Talsma (Canberra, ACT, Australia) 17
Effects of irrigation and nitrogen fertilisation on fluxes of soil mineral nitrogen in a stand of *Pinus radiata*
R.J. Raison, M.J. Connell, P.K. Khanna and R.A. Falkiner (Canberra, ACT, Australia)..... 43
Effects of N P K fertilisation on the chemistry of a yellow podzolic soil under *Pinus radiata*
P.K. Khanna, R.J. Raison, R.A. Falkiner, I.R. Willett and M.J. Connell (Canberra, ACT, Australia) 65
Effects of combinations of irrigation and fertilisation on the growth and above-ground biomass production of *Pinus radiata*
P. Snowdon and M.L. Benson (Canberra, ACT, Australia) 87
Dynamics of stem growth of *Pinus radiata* as affected by water and nitrogen supply
M.L. Benson, B.J. Myers and R.J. Raison (Canberra, ACT, Australia)..... 117
Dynamics of *Pinus radiata* foliage in relation to water and nitrogen stress: I. Needle production and properties
R.J. Raison, B.J. Myers and M.L. Benson (Canberra, ACT, Australia)..... 139
Dynamics of *Pinus radiata* foliage in relation to water and nitrogen stress: II. Needle loss and temporal changes in total foliage mass
R.J. Raison, P.K. Khanna, M.L. Benson, B.J. Myers, A.R.G. Lang (Canberra, ACT, Australia) and R.E. McMurtrie (Kensington, NSW, Australia)..... 159
Relations between reproductive growth and vegetative growth of *Pinus radiata*
K.W. Cremer (Canberra, ACT, Australia) 179
Accumulation and retranslocation of foliar nitrogen in fertilised and irrigated *Pinus radiata*
W.J.B. Crane and J.C.G. Banks (Canberra, ACT, Australia) 201
Photosynthesis by mature needles of field-grown *Pinus radiata*
W.A. Thompson (Vancouver, BC, Canada) and A.M. Wheeler (Canberra, ACT, Australia) 225
Using a simulation model to evaluate the effects of water and nutrients on the growth and carbon partitioning of *Pinus radiata*
R.E. McMurtrie and J.J. Landsberg (Canberra, ACT, Australia) 243
A model of canopy photosynthesis and water use incorporating a mechanistic formulation of leaf CO_2 exchange
R.E. McMurtrie, R. Leuning, W.A. Thompson and A.M. Wheeler (Canberra, ACT, Australia) 261
The Biology of Forest Growth experiment: linking water and nitrogen availability to the growth of *Pinus radiata*
R.J. Raison and B.J. Myers (Canberra, ACT, Australia)..... 279
